

Continuous Improvement

Quality, service, technology, environment and work protection are constantly being improved and developed.

The destinations are pretentiously defined and lead to the continuous improvements of our services and to minimize environmental impact. In all areas, processes and risks are periodically reviewed and, if necessary, corresponding measures defined.

Customer-oriented Thinking and Acting

Our whole company is focused onto the development and manufacture of products and services in the highest possible quality. It is our destination to have satisfied and enthusiastic customers.

Every employee helps at its place to realize customer's requirements. We obligate our suppliers onto our quality and environmental requirements.

Quality

Each employee is personally obliged to the quality and environmental requirements. The use of the best available technology under observation of the economic efficiency guarantees capable, safe and environment compatible manufacturing processes. Maximum quality also includes the compliance with demanding environmental standards.

Legal and governmental duties and requirements are minimum standards for TBT.

Management

The improvement of quality, safety and environmental awareness and ownership, competence and flexibility is an ongoing task of our executives. The task of each manager is to achieve the business objectives for quality and environmental policy.

Common planning and realization of projects, personal model as well as a leadership style, strengthen the collaboration of all employees and the quality and ecological awareness.

TBT

QUALITY POLICY & ENVIRONMENTAL POLICY

Prevention of Errors

Through prevention and targeted review of all processes, we strive to one hundred percent quality performance. Errors are to be avoided and not eliminated.

Protection of Environment

The protection of the environment through the use of the current state of the technology in view of the economic viability is part of our actions.

Environmental protection is supported by efficient use of resources and emission and low waste production techniques. With the unsolicited implementation of environmental management DIN EN ISO 14001, TBT strengthened their efforts to ensure the efficient and sustainable environmental protection.
